DETAILED ACTION

1. Applicant's arguments have been fully and carefully considered and applicant's arguments are persuasive with respect to Dang Vu, accordingly the rejections are withdrawn. Applicant's Terminal Disclaimer has been entered and obviates the obviousness-type double patenting rejection made over co-pending 10/648,894 application.

2. The following is an examiner's statement of reasons for allowance:

The prior art fails to teach and/or suggest a method of carrying continuous under pseudo-isothermal conditions and in a predetermined reaction environment a selected chemical reaction which includes the steps of feeding a first flow of a heat exchange operating fluid at a respective predetermined inlet temperature in a least one tubular heat exchanger provided in the reaction the fluid passing through the at least one heat exchanger in a respective inlet/out path, the method further comprising feed a second flow of operating fluid having a predetermined inlet temperature at one or more intermediate positions of the inlet/outlet path of the first flow in the at least one tubular heat exchanger. Also, claimed is the heat exchanger which includes two wide walls, a chamber defined between the walls for operating fluid to be being passed there through, a fluid inlet connector, and a fluid outlet connector in and from the chamber which includes at least a distributor which is fixed to the side walls of the heat exchanger. The distributor permits feeding of a second flow of operating fluid, which then mixes with the first operating fluid. By providing the distributor and selecting the temperature of the second flow of operating fluid which can be introduced at a number locations at one or more intermediate positions in the heat exchanger path, then mixing of the two operating fluids, the second operating fluid will bring the temperature of the first operating fluid back approximately to the inlet temperature thereby providing the pseudo-isothermal conditions for the chemical

reaction to take place which has not been taught or fairly suggested singularly or in combination by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to N. Bhat whose telephone number is 571-272-1397. The examiner can normally be reached on Monday-Friday, 9:30AM-6:00PM.
